OBJECTIVE

I enjoy web development because of the opportunity to problem solve, and craft applications that are both functional and elegant. Having exposure to development with a fullstack approach, I am seeking an entry-level job where I can contribute right away with the skills that I have developed and also grow.

SKILLS & ABILITIES

I have been exposed to and learned front end technologies including, HTML, CSS, Bootstrap, and Materialize CSS, and backend technologies including JavaScript, JQuery, Firebase, and Node.js, Express.js, MySQL, Sequelize, MongoDB, Mongoose, React, Passport.js, and BCrypt, Heroku and GIT. Over the course of this program, had exposure to team collaboration in development, and I have made functional and beautifully designed applications.

EXPERIENCE

Feb 2019 – Aug 2019, *Student, Georgia Tech*

- The fullstack web development program gave me exposure and practice in both front-end and back-end technologies and the ability to develop an app from the beginning to deployment.
- I also learned how to think about problem solving and applying logic in programming.
- I worked in teams to complete projects.
- On the second group project I setup Passport.js and BCrypt in our app to provide login and session user data.

Dec 2010-present, *Attorney, Law Office of Jennifer Moore*

- As an attorney my practice was in immigration law.
- I handled humanitarian and family-based cases.
- One of my primary jobs as attorney was to listen carefully, understand the framework in which to present the clients' cases, and to help my clients tell their story to judges and administrative officers.

EDUCATION

Feb 2019 – Aug 2019, *Fullstack Web Development, Georgia Tech, Atlanta, GA*

Aug 2003 – Aug 2006, *Juris Doctorate, Ave Maria School of Law, Ann Arbor, MI*

Aug 2000 – Aug 2003, *Bachelor of Arts, Studio Art & Communication, GA, Wesleyan College, Macon, GA*
